

- HB1110** **DENTAL ANESTHESIA** (ZENT D) Provides that any rule adopted by the medical licensing board concerning standards for office based procedures that require moderate sedation, deep sedation, or general anesthesia to be administered does not apply to a dental office setting if the dentist who performs the dental services on a patient holds a permit to administer general anesthesia or moderate sedation issued by the state board of dentistry. Allows a licensed dentist who has completed all education requirements in a dental specialty area recognized by the American Dental Association to use a designation or term in conjunction with the dentist's practice. (Current law allows a licensed dentist who has completed a dental anesthesiology residency recognized by the American Dental Board of Anesthesiology before July 1, 2025, to use a designation or term in conjunction with the dentist's practice.)

- HB1112** **MEDICAID REIMBURSEMENT FOR DENTAL SERVICES** (ZENT D) Specifies that Medicaid dental service reimbursement rates (reimbursement rates) must at least be in the fiftieth percentile of one of the specified fee schedules. Requires the office of the secretary of family and social services to: (1) annually review reimbursement rates; and (2) adjust the reimbursement rates based on the review. Requires the new reimbursement rates to be provided before December 15 of each year to the house committee on ways and means and the senate committee on appropriations.

SB4 PUBLIC HEALTH COMMISSION (CHARBONNEAU E) Defines "core public health services" for purposes of public health laws. Adds members to the executive board of the Indiana department of health (state department). Provides that the state department may provide district or regional services to local health departments. Require each local board of health to establish a local public health services fund to receive state funding. Provides a method of allocation of state funding to local boards of health, subject to state appropriations. Allows the state department to issue guidance to local health departments. Requires the state department to make annual local health department reports available to the public. Changes the qualification requirements for a local health officer and requires certain training. Requires the state department to identify state level metrics and county level metrics and requires certain local health departments to report to the state department activities and metrics on the delivery of core public health services. Requires the state department to annually report on the metrics to the budget committee and publish information concerning the metrics on the Internet. Sets political affiliation limitations on local boards of health and adds two members to local boards of health. Requires a multiple county health department to maintain at least one physical office in each represented county. Provides that a new city health department cannot be created after December 31, 2022, but allows current city health departments to continue to operate. Creates the Indiana trauma care commission and sets forth the commission's duties. Specifies that certain vision screenings in schools for students may be performed by an physician or an optometrist. Requires vision screening in kindergarten and first grade (current law allows for the screening in either grade). Modifies the list of vision tests that may be used. Requires the school to send to the parent of a student any recommendation for further testing by the vision screener. Allows for standing orders to be used for emergency stock medication in schools. Allows the state health commissioner or designee to issue a statewide standing order, prescription, or protocol for emergency stock medication for schools. Removes the distance requirement for an access practice dentist to provide communication with a dental hygienist.

SB273

ADMINISTRATION OF ANESTHESIA IN DENTAL OFFICE (JOHNSON T) Provides that a rule requiring an office based setting to be accredited by an accreditation agency does not apply to certain individuals providing anesthesia in a dental office. Allows an anesthesiologist and a certified registered nurse anesthetist to administer moderate sedation, deep sedation, or general anesthesia to a patient in a dental office if certain standards are met.
